CHIBUIKE ONUBA | Data Scientist

Lagos, Nigeria

+234-814-438-3321 onubawinner042@gmail.com chibuike-onuba ChibuikeOnuba My_Portfolio

Education

University of Nigeria Nsukka **Enugu, Nigeria**

Bachelor of Science in Computer Science May 2024

CGPA: *4.24/5.0*

Coursework: *ML/AI, Data Structures and Algorithms, Database Management & Design, Project management, etc.*

Experience

Data Analyst

TransAfam Power Ltd ***May 2023 – October 2023***

- Increased procurement efficiency by 20% via real-time data manipulation using Advanced Excel and Power Query in the procurement tracker.
- Revamped supplier evaluation process by identifying data trends and KPIs leading to a 20% increase in on-time deliveries and a 15% reduction in procurement costs.
- Prepared a mid-year analysis report for the department using data visualizations tools such as Power Bi, Excel and Power Point

Data Scientist

OmdenaAI ***January 2023 – May 2023***

- Collaborated with a diverse team of over 50 data scientists to successfully create an autism prediction model.
- Participated in the development of an innovative Autism Prediction model, intended to aid more than 20 hospitals across India in promptly identifying early signs of autism in children.
- Demonstrated exceptional problem-solving skill, leading to a 15% improvement in the recall rate, significantly improving the precision of Autism case detection.

Projects

ReviewScope: Customer Review Sentiment Analysis App | *Python, NLP, Streamlit*, *NLTK…*

- ReviewScope is an innovative project leveraging Natural Language Processing (NLP) to analyze the sentiment embedded within customer reviews of a product. By employing advanced NLP techniques. ReviewScope extracts valuable insights from customer feedback, shedding light on the overall sentiment towards the product.
- The project features an interactive dashboard that provides users with a comprehensive overview of the sentiment expressed in the collected customer reviews.
- Through intuitive visualization and user-friendly interfaces, it offers actionable insights, allowing businesses to gauge customer satisfaction levels effectively

Autism Prediction among Toddlers | *Python, Streamlit, Machine Learning, ScikitLearn…*

- Implemented advanced machine learning algorithms, including Random Forest and Gradient Boosting, to analyze behavioral data, achieving a precision of 82% and recall of 80% in identifying potential ASD cases
- Developed and implemented a model to swiftly identify early signs of autism in children, proposed to benefit over 20 hospitals in India and facilitate timely interventions to improve outcomes significantly.
- Publicized research findings in a peer-reviewed journal, contributing to the scientific community's understanding of early ASD detection methodologies and garnering 600+ impressions within the first week of publication

Technical Skills

- **Languages:** Python, C++, R, SQL, HTML/CSS, Java
- **Developer Tools:** VS Code, Jupyter Notebook, Google Colab, AWS, GCP, Tableau, Power BI, Streamlit, Flask
- **Technologies/Frameorks:** Sklearn, Pandas, Numpy, Seaborn, TensorFlow, NLP, CV, Pytorch, Git, GitHub

Volunteer Experience / Extracurricular

- Tutored over 200 pupils from 5 schools on basic programming knowledge and applications using Scratch Programming software under **Meenah Tech Solutions**
- Assisted students with developing projects that applied the concepts they learned during tutoring sessions.
- Fostered collaboration between peers by providing group activities that promoted teamwork.
